FEATURED PROJECT

SkyConnect Airline Performance Analysis

Data Analytics Capstone — Tech Studio Academy, April 2026

Tools: MySQL · Power BI · Excel · PowerPoint

A comprehensive analytics project examining flight performance, revenue trends, and operational efficiency for SkyConnect Group of Airlines across key African hubs (Lagos, Nairobi, Cairo, Dakar) covering 2022–2024, with a dataset of 1,000 flights and \$590M total revenue.

- Identified weather and ATC control as the primary delay drivers, accounting for 76.8% of severe delays
- Uncovered revenue growth of 300% from 2022 to 2023 (\$272M peak), with an 8% decline in 2024
- Discovered that regular passengers generate 3x more revenue than premium loyalty tier members
- Identified young adults (15% of passengers) as an underrepresented but high-potential demographic
- Recommended ML-based predictive delay management and loyalty programme restructuring
- Delivered data-backed strategic recommendations to improve customer satisfaction and operational efficiency
